

Kyle Mitchell

Full-Stack Software Engineer

Columbus, GA • (706) 289-8357 • KyleMitchell4444@gmail.com • linkedin.com/in/kyle-mitchell • kylehmitchell.com • github.com/Kylemitchell64

Self-taught full-stack engineer with a Computer Science background, returning to the field in October 2025 after a 2021 injury cut my degree short. In under seven months I went from first line of code to a production application—containerized, CI/CD-deployed, and secured against real attacks. Comfortable across the stack, from C# and ASP.NET Core on the backend to React and JavaScript on the front end, with Docker, Kubernetes, and Terraform for delivery.

EXPERIENCE

Full-Stack Software Engineer

October 2025 – Present

Independent — Self-directed work under senior engineer mentorship

React 19, JavaScript, ASP.NET Core (.NET 8), C#, PostgreSQL, Docker, Kubernetes (AKS), Terraform, Azure DevOps, NGINX, Cypress, ASP.NET Core Identity, JWT, OAuth 2.0.

- Shipped a full-stack task management application from empty repo to production on Azure Kubernetes Service in under six months, containerized with Docker and deployed through a scratch-built Azure DevOps CI/CD pipeline with NGINX ingress and Kubernetes liveness/readiness probes.
- Hardened a live, attacked production API in real time: diagnosed an active XSS injection and flood attack, patched the exposed surface, then drove a full security overhaul taking the API from zero authentication and open endpoints to fully gated, validated, and ownership-scoped. Shipped ASP.NET Core Identity with JWT, Google and GitHub OAuth, rate limiting, input validation, and a .NET 7 to 8 upgrade.
- Migrated the entire stack off AKS to Vercel and Render after Azure credits expired, diagnosing a CORS origin mismatch, a Docker service hostname resolution bug, and a Windows-built node_modules conflict from logs and request traces. Kept the app available with UptimeRobot pinging the Render health endpoint to defeat free-tier sleep.
- Provisioned Azure infrastructure with Terraform (Storage Account, DNS Zone, RBAC role assignments) as reproducible infrastructure as code, paired with a domain through Porkbun and SSL through Azure Static Web Apps.

SELECTED PROJECTS

My Learning Tracker — Full-stack productivity application

2025 – Present

Personal project

React 19 (JavaScript), ASP.NET Core (.NET 8), PostgreSQL, Docker, Kubernetes, Azure DevOps, Cypress.

- Architected a monorepo with Vercel rewrites routing API calls to the Render-hosted backend, replacing a previous NGINX reverse-proxy container setup. Migrated the database from Render Postgres to Neon serverless Postgres with zero downtime.
- Built the full authentication layer: ASP.NET Core Identity with JWT, Google and GitHub OAuth, user-scoped task ownership, rate limiting, and input validation with data annotations and Kestrel body-size caps.
- Wrote a Cypress end-to-end test suite covering CRUD flows and authentication paths across the React front end and ASP.NET Core API.

Personal Portfolio — kylehmitchell.com *HTML, CSS, JavaScript, Terraform, Azure DNS, Vercel*

Static site. Domain through Porkbun. Provisioned on Azure via Terraform (Storage Account + DNS Zone), migrated to Azure Static Web Apps for SSL, then to Vercel.

SKILLS

Languages & Frameworks: C#, JavaScript, SQL, HTML, CSS, React 19, ASP.NET Core (.NET 8), Entity Framework Core

Identity & Security: ASP.NET Core Identity, JWT, OAuth 2.0 (Google, GitHub), Rate Limiting, Input Validation, CORS, HTTPS / TLS

Infrastructure & DevOps: Docker, Docker Compose, Kubernetes (AKS), Terraform, Azure DevOps Pipelines, GitHub Actions, NGINX, WSL2

Cloud & Data: Microsoft Azure, Azure DNS, Azure Static Web Apps, Vercel, Render, Neon, PostgreSQL, SQL Server

Testing, Practices & Tools: Cypress, REST API Testing, Health/Readiness Probes, Git, Agile, Root-cause Debugging, Production Diagnostics • *Currently learning: TypeScript, advanced JS fundamentals*

CERTIFICATIONS & EDUCATION

Microsoft Azure Fundamentals (AZ-900)

Microsoft — Passed April 16, 2026

Columbus State University

CS, Software Systems Track (2018–2021, interrupted by 2021 injury)
